“Lean, mean, power machine certainly sums up the new Diatex Slim Power. It's substantially slimmer than most 13m poles, weighs just 870g and has an elastic rating of up to 20.”

## Lean Mean Power Machine

Designed by Preston Innovations and built by Lerc International, the Diatex Slim Power is so slim you could be fooled into thinking it's not a true power pole. With an elastic rating of 20... it definitely is. In fact it's a very lean, very mean, power machine that's designed for carp and match fishing with all strengths of elastic.

LENGTH: 13.0M  
WEIGHT: 870G @ 13M  
ELASTIC RATING: UP TO A TRUE 20 OR RED HYDRO  
RRP: £225  
INTRO PRICE: **£425**

Comes complete with:  
• 2 extra Long Top 2 Power Kits

# First Strike...

Welcome to what is the end of an era for **News Reel** and what is soon to be a new beginning. Technology has caught up with me at last; who would of thought that when I took over as fishery manager seven years ago that things would have gone so far.

**News Reel** is moving to a **web orientated magazine** which can be found at [www.news-reel.com](http://www.news-reel.com).

The **new web site** will be up dated weekly keeping you up to date with your favourite articles such as a comprehensive match results program including your **Monday Gold, Wednesday Silver, Thursday Rover, Junior & Ladies** results along with all your **festival reports**, we will also include your **Carp of the Week** results, a **photo gallery**, and loads of **mail order bargains**.

We will still be carrying on with all the features including **Tried & Tested, Kick start, Match Focus, News Bites** and **Feedback**.

We will even have our competitions for you to win products that we have **Tried and Tested**.

This will be our way of bringing you up to date information on your fishing holiday whether you come to **White Acres** for pleasure or competition...
